Christy's® Red Hot Vinyl Adhesive offers superior adhesion and weathering capabilities and is now offered in a UV-resistant, non-yellowing clear formula for use on all colors of vinyl including PVC fence, deck, siding and window installations.

## Red Hot Vinyl Adhesive

Red Hot Clear Vinyl is a versatile, high-performance adhesive that can be used on all types and colors of PVC fence, railing, deck, siding, furniture, and windows for installation and repairs. It can also be used for signage systems and lettering. Red Hot White Vinyl also offers UV-stable outstanding performance and will not discolor, yellow or crack with exposure to UV. It is ideal for installing, mending and gap filling with white substrates. Red Hot Clear Vinyl has been carefully formulated to resist UV-degradation and to retain a clean, clear appearance. It applies clear and dries to a transparent, flexible and waterproof bond. It will not yellow or go brittle with age or sunlight. It is not affected by weather and temperature extremes, and is highly resistant to oil, fuel, grease, and many other chemicals.

No Discoloring Over Vinyl Material

## NEW Christy's Red Hot Vinyl 2-Part Construction Adhesive

Two easy to use products that bond PVC vinyl to non-PVC materials. Christy's 2-Part Vinyl both fills and minimize gaps around trim to ensure a lasting bond in all conditions. Can also be used to bond wood, metal, concrete, masonry, glass, rigid plastics and other materials to themselves or other surfaces. Solvent free with no volatiles and low odor.
